

Step 1. Click on the *Apple Menu* and choose *Control Panels*, then choose *Remote Access* from this menu

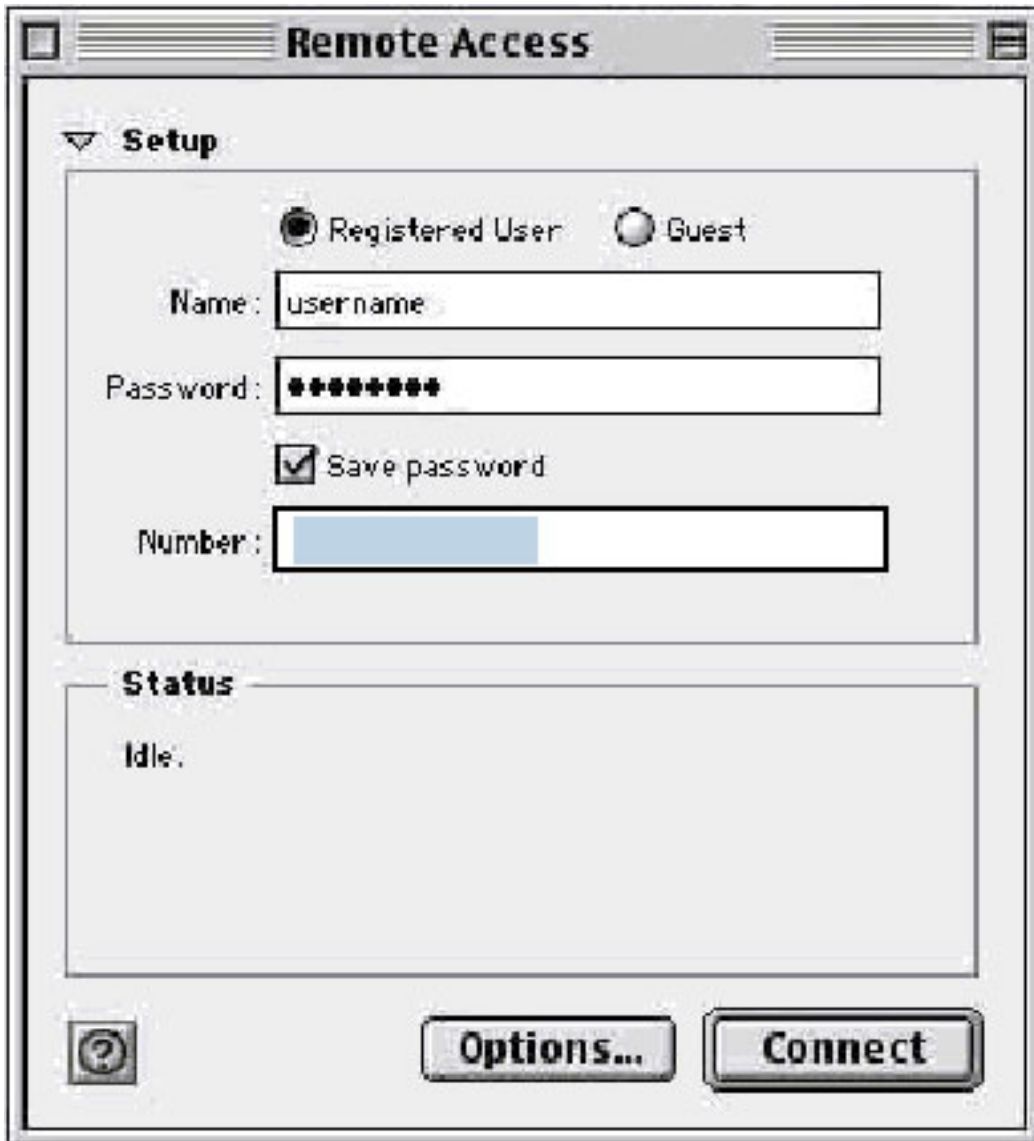

Previous | [Next](#)

Step 2. Change the telephone **Number** box to reflect your new local number, After you have changed the number you can close this window or click connect. If you choose to close the window you will be prompted to save your changes.

Congratulations you're done!

Please remember you are responsible for choosing a number that is local for you, kua.net is not responsible for any charges you may incur by choosing the incorrect local number. You can find a local number at <http://www.kua.net/support>.

The image shows a window titled "Remote Access" with a "Setup" section. In the "Setup" section, there are two radio buttons: "Registered User" (selected) and "Guest". Below these are three input fields: "Name" containing "username", "Password" containing "*****", and "Number" which is currently empty and highlighted in blue. There is a checked checkbox for "Save password". Below the "Setup" section is a "Status" section with the text "Idle.". At the bottom of the window, there is a help icon (question mark in a circle), an "Options..." button, and a "Connect" button.
